Our school has conducted various activities to contribute to the Swachha Bharat Campaign. Recently, a workshop on the proper usage and disposal of 'plastic' was conducted in the school, which informed the students that plastic is not a bad omen, but a useful material, which when used efficiently and sustainably can prove to be a boon for humans. We have turned this solution to many problems into a problem. the school also organized an art drive exploring the creativity of students, on this topic (the pictures have been displayed above). A plantation drive, in which the student council participated whole heartedly was also a part of our contribution to Swachch Bharat. The students prepared debates, speeches and skits on Swachhta to be presented in the 'Literature Skills' classes as well. The entire Sathya Sai family enthusiastically participated and will keep participating in such campaigns leading to a better India.
